

* Shopguard

Shopguard's wide variety of highly sophisticated security sensors do not only protect valuable hard-goods, they also power them up enabling customers to test all features of the product, which is resulting in higher turn over for the retailer.

* Control units

Our control units are of different sizes, enabling retailers to choose the proper and most cost efficient size according to the number of products they have on display. Master 8, Master 16, Master 24 and Master 32 are operated by digital keys, making it impossible turning the system off with a copied or tampered key. Key pads and remote controls enable easy in store operation and are available for all control units.

The Master8 in combination with Slave units is an expandable system which allows protection of products from 8 to 64 items. Up to 7 Slave units can be attached to one Master8.

* Sensors

Shopguard's loop alarm product range is offering ingeniously designed, compact and durable, professional high quality security sensors and sophisticated protection methods with integrated charging capability. Our range is continuously growing thanks to an R&D team of 12 people. ShopGuard is capable of designing market/client specific sensors within shortest time with an almost unlimited production capability.

PHSP: product holder with spiral cable. **PHY**: product holder for the retractor. **CHS**: camera holder slim. **CHW**: camera holder wide. **CH**: charging capability. **NOCH**: no charging capability. **SM**: small. **SL**: slim. **W**: with wings.
