

SMART BASE

UNIVERSAL SOLUTION

Where price and compatibility matters, our new Smart Base family plays big. Being universal, this innovative new solution makes two things possible: **powering** and **securing** a long list of devices and charging them using **OEM chargers and cables**.

5V Devices:

Phones, tablets, cameras, headphones, music players, GPS navigation devices, or even speakers can be powered, secured and charged at the same time.

If you want, the optional **Shopguard 5.2V PSU** will also provide enough power to run these devices continuously in energy demanding demo mode.

By using Smart Base, the store can keep maintenance and investment costs low. This is truly a smart and universal solution that can be installed in seconds and used with various accessories.

*shopguard
